I am a salesman and I bought XM Radio for the variety and ability to listen to radio anywhere I drive in the Midwest. I was very happy when XM added the weather and traffic channels and I cannot imagine why anybody would want to take that away. The National Assoc. of Broadcasters attempt to take these services away from me is very disheartening because it sounds like they want to decide what I can and cannot listen to even though I am paying to listen to XM. Maybe they should go after the weather Channel as well.
